CONTENTS.

	PAGE
Life and Death in our Mines. By Jabez Hogg, F.L.C., M.R.C.S., etc.	1
Marine Telegraphy. By Richard Bithell, B.Sc., Ph.D.	17
Truffels and Morels. By the Rev. M. T. Berkeley, M.A., F.L.S. *With a Tinted Plate*	28
Owen on the Vertebrates	33
The Humming-Bird Hawk-moth. By the Hon. Mrs. Ward. *With a Coloured Plate*	39
Results of Meteorological Observations made at the Kew Observatory. By G. M. Whipple	46
Notes on Byssus. By T. Graham Ponton	53
Lunar Details.—Occultations. By the Rev. T. W. Webb, A.M., F.R.A.S.	56
Comets. By G. F. Chambers	64
Stratified Discharges in Vacuum Tubes. *With a Coloured Plate*	81
On Fish Culture. By "An Old Bushman."	85
Notes on Fungi.—No. V.—Ferruginous-spored Agarics. By the Rev. M. J. Berkeley, M.A., F.L.S. *With a Tinted Plate*	93
Detonating Meteors of February and November. By A. S. Herschel, B.A.	99
Notes on our Common Indian Birds. By R. C. Bevan, Lieut.	102
The Newton Stone	107
Rambles in Cornwall for Minerals and Ferns. By Bernard Henry Woodward	111
Notes on a Winter Visit to Mount Etna. By Professor D. T. Ansted, F.R.S.	125
Pre-historic Man in France	132
Notes on the comparative Geology of the Earth and Moon. By Henry J. Slack, F.G.S.	135
The Musk-Rats as Builders and Miners. By J. K. Lord, F.Z.S. *With a Coloured Plate.*	161
Lunar Details.—Clusters, and Nebulæ.—Crimson Star.—Occultation. By the Rev. T. W. Webb, A.M., F.R.A.S.	173
On the Application of Recent Scientific Discoveries to the Useful Arts. By Professor M'Gauley	182

182585

PAGE

On the Development of the Ovum of the Common Newt, Triton Cristatus. By the Rev. F. Howlett, M.A., F.R.A.S. *With a Coloured Plate* 192

Great Gales of November and December, 1865. By A. S. Herschel, B.A. 198

Star Maps 204

On Fish Culture. By "An Old Bushman." 209

Pleasant Ways in Science.—No. IV.—Physical Forces 217

Deceptive Figures 223

Powell and Lealand's New Binocular 225

On the Products of the Genus Eucalyptus. By John R. Jackson. *With a Tinted Plate.* 241

The Planet Saturn.—Variable Stellar Light.—Occultations. By the Rev. T. W. Webb, A.M., F.R.A.S. 247

Description of the Lunar Eclipse of March 31, 1866. By Alexander Brown 267

Notes on a Winter Visit to Mount Etna. By Professor T. D. Ansted, F.R.S. 268

Mr. Browning's Reflecting Telescope. *With Illustrations.* 276

Mr. Wenham's New Binocular 282

Floral Immigration at Mitcham, Surrey. By Ralph Tate, F.G.S., etc. 284

Gassiot's Electrical Researches with Vacuum Tubes. *With a Coloured Plate* 289

Micro-Spectroscope Investigations. Letter from Prof. Church ... 291

Results of Meteorological Observations made at the Kew Observatory. By G. M. Whipple 293

The Smithsonian Institution 299

North-Western Woodpeckers. By J. K. Lord, F.L.S. *With a Coloured Plate* 321

Connemara. By George S. Brady, M.R.C.S. 334

The Waxwing, the Pine Grosbeak, and the Crossbills. By "The Old Bushman" 345

On the Structure and Circulation of Nitella Translucens. By the Rev. Fred. Howlett, M.A., F.R.A.S. *With a Coloured Plate* 352

New Facts in Botanical Geography. By Edmund Boissier 358

The Clamor-Æstus, or Tide Shriek, a Self-acting Fog Warning for the Coast. By H. Temple Humphreys, Assoc. Inst., C.E. 361

The Planet Saturn. By the Rev. T. W. Webb, A.M., F.R.A.S. 366

The "New Star." Mr. Huggins' Investigation 382

On the Velocity of Nervous Impressions. By W. F. Barrett 386

Highley's Pocket Stand Microscope 391

Egg Fungi. By the Rev. M. T. Berkeley M.A., F.L.S. *With a Coloured and Tinted Plate* 401

On the Application of Scientific Discovery to the Useful Arts.—No. II. By Professor M'Gauley 407

Photo-Micrographs. By Brevet-Captain Edward Curtis. *With an Illustration* 419

Popular Astronomy 421

PAGE

EQUIGRAPHIC PROJECTIONS OF THE GLOBE. By R. A. PROCTOR, B.A. *With Illustrations* 429

SCHULTZE'S ARTIFICIAL DIATOMS. By HENRY SLACK, F.G.S. 442

REGISTRATION OF COINS 445

COTTA ON ROCKS 448

ANIMAL FORCE AND ANIMAL FOOD. By J. BROUGHTON, B.Sc. 452

MODERN EXPLOSIVE COMPOUNDS 461

THE PLANET SATURN. By the Rev. T. W. WEBB, A.M., F.R.A.S. 466

LITERARY NOTICES.—Agassiz's "Sea-side Studies in Natural History," 149; "Treasury of Botany," 151; "Catalogue of Works on the Microscope," 151; "Geological Magazine," 151; "The Household," 152; "Contributions to Natural History," 152; "Anthropological Review and Popular Magazine," 152; "Out West," 153; "Castaway on the Auckland Islands," 153; "Proceedings and Transactions of the Nova Scotian Institute," 154; "Chemistry for Students," 234; "Dictionary of Science," etc., 236; "On the Anatomy of the Vertebrates," by Owen, 305; "Reliquiæ Aquitanicæ," 306; "Anthropological Review," 307; "The Harmonies of Nature," 474; "Elementary Treatise on Physics," 475; "Handbook of Natural Philosophy," 475; "Rain and Rivers," 476; "A Little Book about Learning the Pianoforte" 476

ARCHÆOLOGIA 73, 142, 226, 302, 392, 470

PROGRESS OF INVENTION 68, 144, 229, 311, 396

PROCEEDINGS OF SCIENTIFIC SOCIETIES 77, 154, 236, 308, 395, 477

NOTES AND MEMORANDA 79, 157, 238, 317, 399, 478

ILLUSTRATIONS.

ILLUSTRATIONS IN COLOURS.
